

T■RO · LAUNCH BUNDLE

12 scripts. 1 application.

*Kid Money launch videos for TikTok and Reels,
plus the CDR accredited requestor application checklist.*

Prepared for: Kate Hudson, Founder & Director, Assembl Ltd

Date: 12 May 2026

Status: Ready to film & ready to file

How to use this

Part 1 is twelve short-form video scripts for the Kid Money launch — three hook types, four scripts per hook, designed to be shot back-to-back over one weekend with one kid and one parent on camera.

Part 2 is a checklist of everything required to file as an accredited requestor under the Customer and Product Data Act 2025. It is in the order MBIE will ask for it. Tick each item, gather the evidence, and file when the bundle is complete.

PART 1

Kid Money launch videos

Twelve scripts across three hook types. Run all twelve through the Larry Loop (dispatch-loop skill) once Kid Money is in soft launch with the first 20 households. Aim is one breakout at over 500k views in the first month.

Hook type	What it says	Target audience
Kid-led	Filmed from the kid's POV. Kid is the protagonist showing the other kid how to use the app.	Other kids and their parents
Parent-led	Filmed from a parent's POV. Practical, slightly tired, talking to the camera.	Parents on Facebook groups, scrolling Reels
Receipt-led	Screen recording of the app + a voiceover. Shows the actual flow of the app.	Parents who want proof before signing up.

Production notes

- Each script is 25–45 seconds. Run-time on screen targets 28–35s.
- Shoot vertical (9:16). Natural light wherever possible. iPhone-grade quality is fine — over-produced reads as ad.
- Same kid and same parent across all twelve. Audience memorises faces; a recurring duo is a brand.
- No music in the first 3 seconds. Voiceover starts cold. Music can come in from second 4.
- On-screen text in the first 1 second to capture sound-off viewers — TikTok still has many of them.
- Caption is the hook for sound-off too. Don't bury the lede.

THE TWELVE SCRIPTS

SCRIPT 01 · KID-LED · 28 SEC

The bank balance reveal

***VISUAL.** 12-year-old in school uniform, sitting on bed, opens phone to camera.*

VO. "My mum pays me through an app now."

***ON-SCREEN.** MY MUM PAYS ME THROUGH AN APP NOW*

***VISUAL.** Quick cut. Kid in kitchen, emptying dishwasher.*

VO. "I do a job. I take a photo. She approves it."

***VISUAL.** Close-up of kid's phone showing the ANZ Go Money app, balance \$47.50.*

VO. "And now I've got \$47.50 in my actual bank account."

***VISUAL.** Cut to kid grinning at camera.*

VO. "I haven't asked her for money in three weeks."

***ON-SCREEN.** T■RO · the kid money agent · made in Aotearoa*

CAPTION. POV: your mum just discovered the kid money agent and you're \$47 richer ■
#nzkids #pocketmoney #kiwiparents

SCRIPT 02 · KID-LED · 32 SEC

The Give jar payout

***VISUAL.** 10-year-old holding phone, slightly excited.*

VO. "My Give jar just hit five bucks."

***ON-SCREEN.** MY GIVE JAR JUST HIT \$5*

***VISUAL.** Quick on-screen explainer: three jars — Spend, Save, Give.*

VO. "Every time I get paid for a job, ten percent goes here."

***VISUAL.** Kid taps GIVE on their phone. SPCA logo appears.*

VO. "And when it hits five it goes straight to SPCA."

***VISUAL.** Cut to kid hugging family dog on couch.*

VO. "Five bucks of dog food. Off me."

***ON-SCREEN.** T■RO · koha built in*

CAPTION. I'm 10 and I just donated \$5 to SPCA from my chore money. Don't make it weird ■
#spca #nzkids #pocketmoney

SCRIPT 03 · KID-LED · 26 SEC

Catching mum trying to skip the photo

VISUAL. 11-year-old, deadpan to camera.

VO. "Mum said I did a bad job on the dishwasher."

ON-SCREEN. MUM REJECTED MY DISHWASHER PAYMENT

VISUAL. Cut to a photo on the phone — clean dishwasher, very obviously empty.

VO. "This is the photo."

VISUAL. Cut back to kid, eyebrows raised.

VO. "You tell me."

ON-SCREEN. I rest my case

VISUAL. Quick cut to a re-paid notification: \$2.50 — Spend \$1.50, Save \$0.75, SPCA \$0.25.

VO. "She approved it on appeal."

ON-SCREEN. T■RO · there is an appeals process

CAPTION. the dishwasher was clean mum. don't gaslight me. #nzkids #pocketmoney
#siblingrivalry

SCRIPT 04 · KID-LED · 35 SEC

The little sister thinks she's earning

VISUAL. 14-year-old, smug, recording 6-year-old sister 'tidying' a room.

VO. "My sister thinks she's earning a dollar for tidying her room."

ON-SCREEN. she's six. she's so happy.

VISUAL. Sister proudly shoves one toy onto a shelf, smiles into the camera.

VISUAL. Older sister to camera.

VO. "Mum's actually paying her a dollar. Mum's not telling her she could be on \$4 if she actually tidied the whole thing."

VISUAL. Sister hits *DONE* on the parent's phone, photo of one toy on a shelf.

VISUAL. Cut to confirmation: \$1.00 — Spend \$0.70, Save \$0.20, SPCA \$0.10.

VO. "Anyway she gave ten cents to SPCA. Future Kiwi."

ON-SCREEN. T■RO · starts them young

CAPTION. I'm not going to tell her about the higher rates ■ #bigsisterenergy #nzkids
#pocketmoney

SCRIPT 05 · PARENT-LED · 32 SEC

Six weeks no chore fight

***VISUAL.** Parent in kitchen, mid-morning, holding a mug.*

VO. "I haven't had a chore fight with my kids in six weeks."

***ON-SCREEN.** 6 WEEKS. NO CHORE FIGHTS.*

***VISUAL.** Cut to phone screen showing T■RO Kid Money — three kids listed, jobs done this week.*

VO. "I set up jobs in this thing called T■RO. Each kid has their own list. Each job has a price."

***VISUAL.** Parent shrugs, slight smile.*

VO. "They do a job. They take a photo. I approve. Money goes into their actual bank account, splits three ways automatically."

***VISUAL.** Wide shot: kids busy doing things in the background.*

VO. "I don't nag. I don't carry coins. I don't argue. I just approve."

***ON-SCREEN.** T■RO · the kid money agent*

CAPTION. I no longer carry cash, I no longer nag. Just an app and three approvals on a Sunday night. Auckland mum approved ✓ #nzparents #kiwimums

SCRIPT 06 · PARENT-LED · 30 SEC

My budget vs their bank

***VISUAL.** Parent at kitchen table with a notebook and phone.*

VO. "I figured out how much I was actually giving my kids per week. Cash. Casual transfers. The whole thing."

***ON-SCREEN.** I added it up. I cried a little.*

***VISUAL.** Notebook close-up. "Casual cash to kids: \$32/wk" written down.*

VO. "Thirty-two dollars a week. With no idea where it was going."

***VISUAL.** Cut to T■RO dashboard: kids' jobs done, exact amounts paid, breakdown by jar.*

VO. "Now I pay them more — about \$40 a week between two of them — but I know exactly what each cent was for."

***VISUAL.** Parent to camera.*

VO. "And ten percent of it goes to SPCA. Which is more charity than my budget was doing."

***ON-SCREEN.** T■RO · visible money*

CAPTION. I was hemorrhaging \$32 a week in 'oh just take a tenner'. Now I pay them more and it's tracked. 10/10 #nzparents #moneytalk

SCRIPT 07 · PARENT-LED · 28 SEC

The Sunday night settle-up

VISUAL. *Parent on couch, Sunday evening, phone in hand.*

VO. "My new Sunday night ritual takes 45 seconds."

ON-SCREEN. *45 SECONDS. EVERY SUNDAY.*

VISUAL. *Close-up of phone — T■RO shows seven jobs to approve. Parent thumbs through them.*

VO. "Tama: dishwasher Monday, lawn Thursday. Maia: feeding the cat all week, vacuum Saturday."

VISUAL. *Each one gets an approve tap. Total \$18.50 paid out.*

VO. "Eighteen dollars fifty. Goes into their accounts tonight. Splits itself three ways."

VISUAL. *Parent puts phone down. Picks up wine.*

VO. "Then I'm done. No more conversation."

ON-SCREEN. *T■RO · one tap each*

CAPTION. Sunday night used to be 'BUT YOU SAID' for 45 minutes. Now it's 45 seconds.
Worth every cent #nzparents #sundaynightreset

SCRIPT 08 · PARENT-LED · 34 SEC

The grandmother test

VISUAL. *Parent walking down a hallway. Voice slightly tired.*

VO. "My mum thinks paying kids for chores is wrong."

ON-SCREEN. *NAN THINKS THIS IS WRONG*

VISUAL. *Cut to nan in living room, arms crossed.*

VO. "And she's not wrong, kind of."

VISUAL. *Parent in T■RO, scrolling to the four pou framing screen.*

VO. "But this app frames it differently. It's not 'do work, earn money'. It's 'contribute to the whānau, get acknowledged with koha'."

VISUAL. *Close-up of three jars — Spend, Save, Give.*

VO. "And every payment splits three ways. Including ten percent to charity. The kids pick."

VISUAL. *Back to nan. Slight nod.*

VO. "Nan's not sold. But she's quieter about it."

ON-SCREEN. *T■RO · built for Aotearoa*

CAPTION. got Nan to mostly stop side-eyeing me. that's a W in my book #nzparents
#kiwiparenting

SCRIPT 09 · RECEIPT-LED · 36 SEC

Screen recording: chore to bank

VISUAL. Screen recording. T■RO app on parent's phone, opens to approvals queue.

VO. "This is what happens when my kid finishes a chore."

ON-SCREEN. REAL TIMING. NO CUTS.

VISUAL. Approval card shows job, photo, \$2.50.

VO. "He took the photo at 5:14. I'm approving now."

VISUAL. Parent taps approve. Loading spinner for about 2 seconds.

VO. "It's calling ANZ. Two seconds."

VISUAL. Confirmation screen: \$2.50 sent, bank reference visible.

VO. "Done. Paid. Money's in his ANZ account."

VISUAL. Cut to kid's phone (separate device), notification pops up.

VO. "And he just got the split: \$1.50 Spend, \$0.75 Save, \$0.25 to SPCA."

ON-SCREEN. Total time: 8 seconds

CAPTION. Yes the money actually moves. Yes it's real. Yes it's NZ-only #nzbanks
#pocketmoney #cdr

SCRIPT 10 · RECEIPT-LED · 38 SEC

How the three jars work

VISUAL. Screen recording, T■RO settings page, kid profile.

VO. "Every payment splits three ways. Here's the default for a 10-year-old."

ON-SCREEN. DEFAULT SPLIT, AGE 10

VISUAL. Three jars shown — 60% Spend, 30% Save, 10% Give.

VO. "Sixty percent Spend, thirty percent Save, ten percent Give."

VISUAL. Parent slides Save up to 40%, Spend down to 50%.

VO. "You can tweak it. Older kids can ask for a change — you have to approve."

VISUAL. Close-up of charity picker — SPCA, KidsCan, Forest & Bird etc.

VO. "Kid picks their charity at signup. Once their Give jar hits five bucks, it pays out automatically."

VISUAL. Receipt screen showing \$5 koha to SPCA, dated.

VO. "This was Tama's first one. Two weeks of doing the dishwasher."

ON-SCREEN. T■RO · Spend · Save · Give

CAPTION. How the 3-jar split actually works. We don't take a cut. Charities just get the koha.
#spca #nzkids #financialliteracy

SCRIPT 11 · RECEIPT-LED · 30 SEC

The photo proof flow

VISUAL. *Split screen: kid's phone (left) and parent's phone (right).*

VO. "Kid gets a text at 5pm. 'Dishwasher tonight, \$2.50, reply DONE with a photo when finished.'"

ON-SCREEN. *5PM SMS*

VISUAL. *Kid takes photo, sends.*

VO. "He empties it. Takes a photo. Sends DONE."

VISUAL. *Parent's phone pings. Approval card shows kid's photo plus T■RO's note: 'Looks empty to me.'*

VO. "I get a notification with the photo. T■RO gives an opinion. I make the call."

VISUAL. *Parent taps approve. Payment confirmation.*

VO. "One tap. Done."

ON-SCREEN. *T■RO · parent always decides*

CAPTION. the agent has an opinion. I have the final say. that's the deal #nzparents
#pocketmoney

SCRIPT 12 · RECEIPT-LED · 40 SEC

The privacy bit, plainly

VISUAL. Parent to camera, sitting at kitchen bench.

VO. "Quick one on privacy because I asked, and the answer's not bad."

ON-SCREEN. THE PRIVACY BIT

VISUAL. Cut to T■RO's privacy settings — clean, one-screen view.

VO. "Kids don't sign up themselves. Ever. I made the kid accounts."

VISUAL. Settings show: 'No data about your kids is used for training. Ever.'

VO. "My kids' photos and job history aren't used to train any AI."

VISUAL. Settings show: 'Photos auto-deleted after 30 days.'

VO. "The photos of completed chores get deleted after a month."

VISUAL. Settings show: 'All data deleted within 90 days if you leave.'

VO. "And if I cancel, all the data about my kids gets deleted within 90 days. There's an audit log."

ON-SCREEN. T■RO · built under NZ Privacy Act 2020

CAPTION. kids data does not exist outside our wh■nau in this app. asked and answered.
#nzparents #privacy

DISTRIBUTION PLAN

Week 1 — soft post

Post scripts 1, 5, and 9 (one kid-led, one parent-led, one receipt-led). No paid amplification. Watch which one outperforms the others by 2x.

Week 2 — double down

Take the winning hook type from week 1 and post two more in that category. Post one of the other two hook types as a control.

Week 3 — the Larry Loop

Plug the analytics from weeks 1–2 into the dispatch-loop skill. Let Larry generate three new scripts in the winning hook style, shoot them over a weekend, post one a day for three days.

Week 4 — paid amplification on the breakout

Whichever video has the best organic completion rate, put \$200 of TikTok Spark Ads behind it targeting NZ parents 30–50. Not a second more. Spark Ads on viral content compound; Spark Ads on average content burn money.

Months 2 and 3 — scale or pivot

If one video has cleared 500k views, scale that hook type and produce 8 more in the same vein. If nothing has cleared 100k, stop and re-evaluate the wedge before spending more on production.

***Budget for the full launch:** \$0–\$200 in paid amplification (week 4 only), plus your time and one weekend of filming. Anything beyond that and we're forcing it.*

PART 2

CDR accredited requestor application

Everything required to file as an accredited requestor under the Customer and Product Data Act 2025, in the order MBIE will likely ask for it.

Application fee (one-off)	\$1,500 + GST
Renewal fee (annual)	\$1,000 + GST
Accreditation class	Non-intermediary
Processing time (estimate)	8–12 weeks
Earliest payments live	~14 weeks from filing
Banks at go-live	ANZ, ASB, BNZ, Westpac (live since 1 Dec 2025)
Kiwibank payments	1 June 2026
Kiwibank customer data	1 December 2026

1. Legal & corporate

Foundation paperwork that MBIE will check first.

- **NZBN.** Assembl Ltd's New Zealand Business Number. Already exists. Confirm the registered address on the NZBN register matches what we'll put on the application.
- **Companies Office records.** Pull a current company extract — directors, shareholders, addresses. PDF from companiesoffice.govt.nz.
- **Registered office address.** Must be a physical NZ address. Confirm Assembl's registered address is current.
- **Directors' identity verification.** Each director provides government ID (passport or NZ driver licence). Used for fit-and-proper checks under the Anti-Money Laundering rules MBIE applies for CDR.
- **Beneficial ownership disclosure.** Anyone with 25% or more of Assembl Ltd's shares or voting rights, disclosed with ID.

2. Financial service provider (FSP) registration

Required because Assembl will be initiating payments. This is one of the two heaviest items in the application.

- **FSP registration.** Apply via fsp-register.companiesoffice.govt.nz. Fee approximately \$460 + GST initial, \$75/yr ongoing. Allow 4–6 weeks for the registration itself.
- **Dispute resolution scheme membership.** Join one of the four approved schemes — Banking Ombudsman, Insurance & Financial Services Ombudsman (IFSO), Financial Dispute Resolution Service (FDRS), or Financial Services Complaints Ltd (FSCL). FSCL is the most common for fintechs. Annual fee ~\$1,500.
- **AML/CFT compliance program.** Even if Assembl is a low-AML-risk reporting entity, the program documentation has to exist. Risk assessment, customer due diligence procedures, suspicious activity reporting policy, training program.

3. Insurance & financial coverage

MBIE will not accredit a requestor without evidence of adequate coverage against liabilities. The exact thresholds will be in MBIE's accreditation guidance — verify these against the current published rules at filing time.

- **Cyber liability insurance.** Minimum coverage ~\$1m, typically more. Get quotes from Delta Insurance, Quanta Insurance, AIG. Annual premium ~\$3k–\$8k for a startup of Assembl's profile.
- **Professional indemnity insurance.** ~\$1m coverage, typical for a fintech. Often bundled with cyber liability.
- **Public liability.** Usually already in place for any operating business. Confirm it covers digital-only activities.
- **Directors and officers (D&O) cover.** Standard for any director of an FSP-registered entity.

4. Security & technical readiness

The other heaviest item. MBIE will look at security posture in detail because Assembl will hold consent tokens that can initiate real payments.

- **The Mana Trust Layer must be functioning.** The April 2026 security audit identified four critical findings — auth stub, orgId null bypass, absent tier gating, Mana Trust Layer not executing. All four must be closed before filing. Bring in a third-party penetration test report as evidence.
- **Penetration test report.** Independent third-party pen test. NZ providers include ZX Security, Aura Information Security, and INSINIA. Budget \$8k–\$15k for a fintech-scope test.
- **ISO 27001 or SOC 2 evidence.** Full certification is not required at filing, but a roadmap with target dates is expected. SOC 2 Type 1 (\$15k–\$25k) is the more realistic short-term target than ISO 27001.
- **Data classification and handling policy.** Written policy covering how CDR-derived data is classified, accessed, encrypted, transmitted, and disposed of.
- **Encryption.** At rest (Supabase column-level encryption for consent tokens) and in transit (TLS 1.3, certificate pinning for bank API calls). Document the current state.
- **Key management.** Document where keys are stored (Vercel env vars at minimum, ideally a dedicated key management service like AWS KMS or GCP KMS via a sidecar). Rotation policy.
- **Access control.** Who at Assembl can access what. Currently you (Kate) are sole; once there are contractors with database access, RBAC must be in place.
- **Audit logging.** Every CDR data access and payment initiation goes to an append-only audit log. The OpenHands event stream pattern is the model — every action is a typed event, immutable, queryable.
- **Incident response plan.** Written runbook for security incidents. Includes the Privacy Commissioner breach notification path for any incident involving personal information.

5. Privacy & data handling

- **Privacy policy.** Specific to T■RO Kid Money — what data is collected, from whom, why, how long, who else sees it. Must address kids' data explicitly even though kids never sign up directly.
- **Privacy Impact Assessment (PIA).** Required for any new use of personal information at scale. Templates are available from [privacy.org.nz](https://www.privacy.org.nz). Get this reviewed by a privacy lawyer (Dentons, Russell McVeagh, or Simpson Grierson all have NZ privacy practices).
- **IPP 3A notification flow.** Working in-product demonstration of how parents are notified when collecting child information from third parties (school newsletters mentioning the kids, etc.).

MBIE may request a demo.

- **Data Processing Agreement template.** For any third party that processes personal information on Assembl's behalf (Supabase, Vercel, the email provider, etc.). Each has its own; collect signed copies.
- **Retention and disposal schedule.** Written schedule for every data type. Already drafted across the three plugin SKILL.md files — formalise into one policy document.

6. Consent flow evidence

- **Consent UX walkthrough.** Screenshots or a recorded screen capture of the full parent consent journey — bank selection, redirect to bank, parent authorises, return to T■RO, kid destination account verification, one-cent test transfer, ongoing payment approval flow.
- **Consent text.** The exact text shown to the parent at each consent step. Reviewed by a lawyer for plain-English compliance.
- **Consent expiry & refresh flow.** Documented and demonstrated — what happens at day 330, day 365, after expiry. No payment ever moves on an expired consent.
- **Withdrawal flow.** A parent can revoke consent at any time, immediately, from inside T■RO. Documented and demonstrated.

7. The application itself

- **Application form.** Filed through MBIE's CDR portal once published. Currently in draft form on mbie.govt.nz. Check the portal at filing time.
- **Application fee.** \$1,500 + GST, paid at submission. Non-refundable.
- **Cover letter.** Two pages max. What Assembl does, what Kid Money does, why we're applying. Include the why-NZ-needs-this framing — first NZ family agent doing direct kid bank payments, koha-built-in, tikanga overlay, etc.
- **Supporting evidence pack.** All of sections 1–6 above, in a single PDF bundle (or whatever format MBIE specifies). Indexed.

8. After filing

- **Response to MBIE queries.** Expect a round or two of clarifying questions. Respond within 5 business days each time — slow responses extend the timeline.
- **Technical onboarding with the banks.** Once accredited, each bank requires a 20-business-day technical info exchange and a further 20-business-day system access window. Plan for 8–10 weeks total bank onboarding once accredited.

- **Testing in bank sandboxes.** Each bank has a sandbox environment. Run full end-to-end tests (consent, CoP, payment, audit logging) before going live.
- **Public registration.** Accredited requestor status is publicly listed by MBIE. Use this as a launch milestone — "Assembl is now an accredited CDR requestor" is a PR-worthy moment.

INDICATIVE TIMELINE

Week	Activity	Owner
1–2	Close the four Mana Trust Layer security findings	Kate + dev
1–4	FSP registration + dispute scheme membership	Kate + lawyer
2–5	Insurance quotes and policies in place	Kate + broker
3–6	Third-party pen test scoped and run	Pen test provider
4–7	Privacy policy, PIA, retention schedule drafted and reviewed	Privacy lawyer
5–8	Consent flow built and documented (Phase 2 of Kid Money build)	Kate + dev
8	All evidence collated into supporting pack	Kate
9	Application filed with MBIE	Kate
10–18	Respond to MBIE queries (assume two rounds)	Kate
18–20	Accreditation granted (assume best case)	MBIE
20–28	Bank technical onboarding (parallel across four banks)	Kate + dev + bank teams
28	First real payment in production	Kate

Note on the timeline. 28 weeks is the all-in estimate from today to first real payment in production. The parallel track is shipping Phase 1 of Kid Money — the no-CDR, manual-transfer-prompt version — within 6 weeks. That lets us soft-launch the product and validate the chore-and-photo loop while the accreditation is progressing. Public Kid Money launch with real CDR payments lines up with week 28, roughly Mid November 2026.

INDICATIVE COST SUMMARY

Item	Estimated cost (NZD, ex GST)
MBIE application fee	\$1,500

FSP registration	\$460
Dispute resolution scheme membership (year 1)	\$1,500
Cyber liability + PI insurance (year 1)	\$4,000 – \$8,000
Penetration test	\$8,000 – \$15,000
Privacy lawyer (PIA + policy review)	\$3,000 – \$6,000
SOC 2 Type 1 audit (target within 12 months)	\$15,000 – \$25,000
Total to file (excluding SOC 2)	\$18,460 – \$36,460
Total in year 1 (including SOC 2)	\$33,460 – \$61,460

***Funding it.** \$33k–\$61k year-one outlay is real money for Assembl. The RDTI claim covers a portion of the security and privacy engineering work as eligible R&D — bring this up with your RDTI adviser at the next quarterly check-in. Callaghan Innovation may also be able to point toward a Research and Development Tax Incentive credit specific to fintech regulatory compliance. Worth a 30-minute call.*

That's the bundle. Twelve scripts ready to film this weekend and an application checklist ready to start working through this week. The hard parts are the security findings (close them first), the pen test (book the slot now, they get booked out), and the privacy lawyer review (start that in parallel with the pen test). Everything else is procedural.
